## Education

---

Bachelor of Economics (2015-2019) | Shaoxing University | China

## Experience

---

### Financial Analyst | Procter & Gamble (Nov.2018-July.2019) | China

- Facilitated expenditure and capital components of Procter & Gamble (China) Supply Chain's annual budgetary process encompassing the preparation, collection, analysis, and concise reporting of budget data. The delivered reports provided executive management with easily digestible information, enabling informed decision-making regarding budget allocations.
- Revamped financial data-manipulation and data-visualization utilizing SQL, Python and Power BI. These tools improved data accuracy and timeline, thereby freeing up time for the team to engage in more strategic endeavors.
- Collaborated with the Product Supply team to execute a range of responsibilities, encompassing data entry, tracking, and analysis. Skillfully managed and tracked financial data totaling \$10 million, while simultaneously assisting in the creation of comprehensive financial analytical reports for a high-value project.
- Played a pivotal role in developing an executive dashboard for monitoring spending trends, meticulously analyzing, and interpreting financial data. This process facilitated the identification of potential cost reduction areas. The resultant executive dashboard empowered the decision-making process, enabling the executive team to allocate resources with precision, culminating in a noteworthy \$2.3 million reduction in supply chain costs.

### Financial Analyst Intern | Bank of Communications (Jun.2017 – Oct.2017) | China

- Contributed to the timely preparation and submission of financial results to various teams, while concurrently conducting comprehensive analysis of industry trends and benchmarking. This analytical insight facilitated informed decision-making processes within the organization.
- Assumed a key role in evaluating and analyzing team-level Key Performance Indicator (KPI) reports to support strategic forecasting for the Business Loans team.
- Monitored and meticulously analyzed the financial data of more than 25 small and medium-sized enterprises (SMEs). Leveraging this data, I developed and employed advanced financial models to identify areas where the SMEs could enhance their financial performance. These insights played a pivotal role in guiding strategic initiatives and driving financial improvements.
- Earned the Intern of the Year Award in 2017. This accolade was a testament to my exceptional performance in data analysis and the successful financial recommendations that I provided.
